

Aeropuerto Internacional del Cibao

## ENVIRONMENTAL POLICY

Cibao International Airport (AIC), in its commitment to environmental protection, assumes the responsibility of developing, applying, and improving an Environmental Management System (EMS) to ensure that all activities implemented in the company are line up with the sustainability strategies.

Our Commitment is:

**ASSURE** compliance with the environmental legislation and regulations of the Dominican Republic.

**DEVELOP** the AIC's Environmental Policy, implementing a structured and documented Environmental Management System (EMS), which allows achieving the environmental objectives.

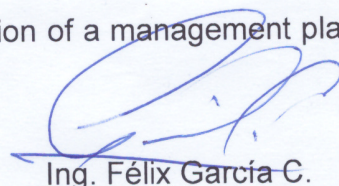

**REVIEW** the EMS periodically and promote continuous improvement.

**COMMUNICATE** the Environmental Policy to employees, contractors, and concessionaires of the Cibao International Airport.

**RAISE AWARENESS** among AIC staff through environmental sensitivity and training programs.

**PREVENT** environmental contamination that could originate in the development of the Airport's operations and activities, following the procedures established in the EMS to minimize the impact generated.

**MITIGATE** greenhouse gases emissions that airport operations may generate directly or indirectly through the implementation of a management plan for this emissions to quantify and reduce them.

Ing. Félix García-C.  
President Board of Directors
